MEET US:

First Founders (to be updated, as we know that more ground work can be laid down to create a more solid foundation)

Xennial

LV 35

HP: ?????

MP: ???

Materia: Operations, Project lead, Technical knowledge, Liquidity Provider, Public Relations.

sNo

LV 35

HP: ?????

MP: ???

Materia: Main Art Developer, Story Developer, Music Producer, Public Relations.

Our Mission

The true aim is to create a sub-culture filled with Art, Anime, Video games, and Hip-Hop by leveraging the XLS-20D Token, which allows for the first stepping stones to display, create, and own immutable pieces of the XRPL.

Our Vision

To see the realm of The Xennials as a means to become acquainted with being apart of change in an entertaining way, and to ease the acclimation to the changes in which commerce, value, and information are exchanged for those who are interested in art, anime, video games and Hip-Hop.

GOAL

Positive community outreach through the spread of creative content (art, music, and other creative outlets).
Our goal is to have the BEST community!

Mythbusters

The *MythBusters* is based off a manga (soon to be created), that is dynamic in its purest form; however, it will continue with releases each season. Time between seasons will be approximately *3 months long*, with new additions/ new changes added as the time progresses. These changes are dependent on the artist's development. There will be NFTs for every season and the way the art is depicted will change, as well as the rarity with attributes within NFTs, which will be reflected on the INVENTORY page on TheXennials.io.

NFT TECHNICAL ATTRIBUTES

XLS-20D:

This will be the ONLY token which will host **The MythBusters** NFTs.

PIÑATA:

IPFS hosting will be handled by Piñata, such that the metadata will be captured efficiently and remained unchanged.

LOCAL IPFS:

All Piñata hashes will be backed up on a local hard-drive using this platform.

xGIL Tokenomics:

The Xennials realm operates off it's own currency known as **xGil** however, this realm resides within the XRPL universe and thus the currencies of XRP and SOLO are

NFT TECHNICAL ATTRIBUTES

also acceptable forms of currency. This realm has only One Hundred Thousand xGil which has been black-holed (no more that can be minted). The culture of The Xennials will indefinitely operate off this amount within the realm. 80% of the xGil will distributed via give-aways to new and established Xennizens to be used for trading and purchasing in the realm of The Xennials. 20% of xGil will be held by the founders of The Xennials for future developments. The account will be black-holed after the first season of ~~The Mythbusters~~ due the requirement of being able to access the need of xGil, which is dependent on the growth of the realm, baring in mind the percentage of xGil to be given away will expand and the percentage of xGil kept by founders will decrease, should this come to fruition. We are PRO culture building and knowledge proliferation.

THE XENNIALS TOKEN SUPPLY (for first season) IS A TOTAL OF 100,000 xGIL TOKENS

- 80% continuing give-aways
- 20% founders (to be use for future developments)

Disclaimer:

This is a **non-profit** project. This project was created with the interests of utilizing the XRPL with 100% belief that dramatic changes will occur due to the advent of block-chain technology with Ripple at the forefront of this this change. We simply want to be apart of this change as much as possible as we believe what will occur will be the ushering in of sound-money. Many of the Xennizens more than likely can see the faults within the current system, and thus by being apart of the new one by carving out a realm for ourselves, we can help those around us in a meaningful way.

Risks:

By using the XRPL we were able to issue out x**Gil** and those who hold the token and wish to trade it on the secondary market, are able to do so. These do come with risks that we would like you to be aware of but are not

Risks:

limited to; regulation policy changes, behaviors of secondary market traders, global news/market changes, and project directional changes. All of which can have an influence with the value of The Xennials realm. Blockchain/Ledger technology changes extremely fast and as we do our best to keep up, we behoove those who participate to do the same. These changes can be akin to growing pains as the foundations and pathways are still being laid forth which can cause volatility within the new asset class. The Xennial founders are up to the challenge of being able to pivot with changes, however we would like ALL Xennizens to take responsibility of where they place their value.

The Company:

Xennial LLC; a company residing with in the United States which focuses on Technology, Data Processing, Hosting and Related Services
